Authors wishing to have papers published in the JOURNAL should communicate them to any Editor or Associate Editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in five volumes of four parts; semi-monthly, except in January, April, July and December, when monthly. Single parts cost £4.00 net (US $12.00 in the U.S.A. and Canada) plus postage. The 1973 subscription price of a volume (which includes postage) is £11.50 net (US $36.00 in the U.S.A. and Canada). Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made after receipt of the subsequent issue.

CONTENTS TO VOLUME 60

PART 1 21 AUGUST 1973

On the Weis-Fogh mechanism of lift generation. M. J. LIGHTHILL *page* 1

Taylor vortices and the evaluation of material constants: a critical assessment. W. M. JONES, D. M. DAVIES and M. C. THOMAS 19

Experiment on convex curvature effects in turbulent boundary layers. RONALD M. C. SO and GEORGE L. MELLOR 43

The decay of perturbations in an electrically conducting and thermally radiating gas. M. SRINIVASA SARMA and L. V. K. V. SARMA 63

Pressure drop due to the motion of a sphere near the wall bounding a Poiseuille flow. PETER M. BUNGAY and HOWARD BRENNER 81

On the integral properties of separated laminar boundary layers. A. A. SFEIR 97

Flow past an impulsively started circular cylinder. W. M. COLLINS and S. C. R. DENNIS 105

Global stability of time-dependent flows: impulsively heated or cooled fluid layers. G. M. HOMSY 129

Turbulent convection in a horizontal layer of water. T. Y. CHU and R. J. GOLDSTEIN 141

Nonlinear resonant wave motion of a radiating gas. JAMES E. ENINGER and WALTER G. VINCENTI 161

Negative shock waves. P. A. THOMPSON and K. C. LAMBRAKIS 187

PART 2 4 SEPTEMBER 1973

Shock attenuation in a 'gradual' area expansion. M. A. NETTLETON 209

Analytic solutions for potential flow over a class of semi-infinite two-dimensional bodies having circular-arc noses. JOHN L. HESS 225

On strong blowing into an incompressible airstream. F. T. SMITH 241

Heat transfer from a hypersonic turbulent boundary layer on a flat plate. G. T. COLEMAN, C. OSBORNE and J. L. STOLLERY 257

Heat transfer from a sphere at low Reynolds numbers. S. C. R. DENNIS, J. D. A. WALKER and J. D. HUDSON 273

Some further studies on the transition to turbulent convection. RUBY KRISHNAMURTI 285

Oscillatory motion in a Bénard cell due to the Soret effect. J. K. Platten and G. Chavepeyer *page* 305

The laser-Doppler velocimeter and its application to the measurement of turbulence. William K. George and John L. Lumley 321

JOURNAL OF FLUID MECHANICS

The JOURNAL OF FLUID MECHANICS exists for the publication of theoretical and experimental investigations of all aspects of the mechanics of fluids.

EDITORS

PROF. G. K. BATCHELOR, DR H. K. MOFFATT

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. G. F. CARRIER, *Pierce Hall, Harvard University, Cambridge, Massachusetts* 02138, *U.S.A.*

PROF. W. C. GRIFFITH, *Mechanical and Aerospace Engineering, North Carolina State University, Raleigh, North Carolina* 27607, *U.S.A.*

PROF. M. J. LIGHTHILL, *Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England*

PROF. J. W. MILES, *Institute of Geophysics and Planetary Physics, University of California, P.O. Box* 1529, *La Jolla, California* 92037, *U.S.A.*

PROF. J. R. A. PEARSON, *Department of Chemical Engineering and Chemical Technology, Imperial College, London SW7 2AZ, England*

PROF. O. M. PHILLIPS, *Department of Earth and Planetary Sciences, The Johns Hopkins University, Baltimore, Maryland* 21218, *U.S.A.*

PROF. L. E. SCRIVEN, *Department of Chemical Engineering and Materials Science, University of Minnesota, Minneapolis, Minnesota* 55455, *U.S.A.*

ASSISTANT EDITORS

PROF. S. H. DAVIS (*Johns Hopkins*)
DR H. E. HUPPERT (*Cambridge*), DR M. E. MCINTYRE (*Cambridge*)

Authors wishing to have papers published in the JOURNAL should communicate them to any Editor or Associate Editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in five volumes of four parts; semi-monthly, except in January, April, July and December, when monthly. Single parts cost £4.00 net (US $12.00 in the U.S.A. and Canada) plus postage. The 1973 subscription price of a volume (which includes postage) is £11.50 net (US $36.00 in the U.S.A. and Canada). Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made after receipt of the subsequent issue.

CONTENTS TO VOLUME 61

PART 1 23 OCTOBER 1973

Deformation and burst of a liquid droplet freely suspended in a linear shear field. D. BARTHÈS-BIESEL and A. ACRIVOS *page* 1

Analysis of turbulent pipe and channel flows at moderately large Reynolds number. NOOR AFZAL and KIRIT YAJNIK 23

Measurements in a self-preserving plane wall jet in a positive pressure gradient. H. P. A. H. IRWIN 33

Plane jet flows from slowly varying nozzles. M. B. LESSER 65

Resonant oscillations in radiative magnetogasdynamics. J. B. HELLIWELL 73

An examination of the influence of waves on the ventilation of surface-piercing struts. R. C. MCGREGOR, A. J. WRIGHT, P. D. SWALES and G. D. CRAPPER 85

The least-damped disturbance to Poiseuille flow in a circular pipe. A. E. GILL 97

Reflexion and transmission at a plane screen with periodically arranged circular or elliptical apertures. F. G. LEPPINGTON and H. LEVINE 109

Waves generated in rotating fluids by travelling forcing effects. G. V. PRABHAKARA RAO 129

The steady two-dimensional reflexion of an oblique partly dispersed shock wave from a plane wall. H. BUGGISCH 159

Spectral measurements of turbulent momentum transfer in fully developed pipe flow. K. BREMHORST and T. B. WALKER 173

The effects of wake splitter plates on the flow past a circular cylinder in the range $10^4 < R < 5 \times 10^4$. C. J. APELT, G. S. WEST and ALBIN A. SZEWCZYK 187

On the existence of multiple Kármán vortex-street modes. D. WEIHS 199
